

# Unit 3

## **Motivation and Leadership**

- Comes from Latin word 'Mover 'which means to move.
- Thus, motivation literally means to act or move.
- It is an inner impulse that includes a person to act on a desired direction.
- The process of influencing or stimulating a person to take action by creating a work atmosphere wherein the goals of the organization and needs of the person are satisfied
- Internal and external factors that stimulate desire and energy in people to be continually interested in and committed to a job
- Different people have different form of motivation. Rewards, punishment, monetary incentives etc

# Types of Motivation

- Intrinsic VS Extrinsic Motivation
- Intrinsic
  - When you want to do something in an organization
  - Means that the individuals motivational thoughts are coming from within
  - The individual is driven by an interest or enjoyment in the task itself, and doesn't rely on the external rewards
  - Engages in completing the task willingly as well as to improve their skills

- Extrinsic
  - When someone else wants you to do something in an organization
  - The desires to perform the task are controlled by an external source
  - When someone else want you to do something in an organization, offering certain rewards, fear of punishment
- Positive VS Negative Motivation

# Theories of Motivation

- Maslow's Hierarchy,
- Herzberg's Two Factor,
- Expectancy,
- Equity

# Maslow's Hierarchy

- Abraham Maslow, 1940's
- Employees behavior are motivated by several needs

## **Physiological needs**

- Basic needs for sustaining human life, food, water, shelter, sleep
- Organization helps fulfill these needs by providing, comfortable workspace, adequate wages and suitable working hours

## **Safety Needs**

- After physiological needs are fulfilled, human tend to safety needs
- Protection from physical danger, economic security
- Organization can provide safer work conditions, pensions for future, and other income protection plan

## **Social Needs**

- Important motivator of employee behavior
- Individual wants to belong to a group, gain acceptance from fellow workers, wants interaction with others in the form of friendship, giving and receiving love

## **Esteem Needs**

- A feel of personal achievement, recognition and representation from others, self esteem, respect
- Organization can recognize their employees achievements, high performance through publicly recognizing them via newsletters or company programs
- Assign more important works

## **Self Actualization needs**

- Highest need level, a feeling that the person's full potential has been realized
- According to Maslow, only a few person reaches this level
- Organization can offer challenging and meaningful works and assignments that require innovation and creativity

# Hertzberg's Two Factor : Hygiene Factors and Motivation

- Frederick Hertzberg, 1959
- In a workplace there are certain factors that lead to job satisfaction and there are certain factors that lead to job dissatisfaction
- The satisfying factors are called motivators and the dissatisfying are called hygiene factors
- **Hygiene Factors**
  - Employees are primarily motivated by lower level needs such as job security, working conditions, company policies, relationships to fellow employees, relationships to superiors, salary and wages
  - These needs when fulfilled improves from job dissatisfaction to no dissatisfaction and doesn't necessarily lead to job satisfaction
- **Motivators**
  - The higher level needs for Achievement, recognition for accomplishment, feel of responsibility, opportunities for growth and advancement
  - Motivates individual for better work performance
  - These needs when fulfilled leads from no job dissatisfaction to job satisfaction

# Difference between Maslow's theory and Herzberg's theory

- Hierarchy of needs: Maslow's theory has need hierarchy. Higher order needs become operational after the satisfaction of lower order needs whereas Herzberg's theory has no need hierarchy. All needs are operational at all times.
- Motivator: In Maslow's theory Unsatisfied needs motivate whereas in Herzberg's theory Only higher order needs motivate
- Nature: Maslow's theory is descriptive whereas Herzberg's theory is prescriptive
- View: Maslow's theory is a macro view relevant to all workers whereas Herzberg's theory is a micro view relevant to related motivation of Professional workers

# Equity Theory

- According to equity theory people are motivated to seek social equity in the rewards they receive for performance.
- Equity is an individual's belief that the treatment he or she receives is fair relative to the treatment received by others.
- Individuals view the value of rewards (outcomes) and inputs of effort as ratios and make subjective comparisons of themselves to other people:

# Conditions / Reactions to equity comparisons

- Feeling equitably rewarded
  - Maintain performance and accept comparison as fair estimate.
- Feeling under-rewarded — try to reduce inequity:
  - Change inputs by trying harder or slacking off.
  - Change outcomes by demanding a raise.
  - Distort the ratios by altering perceptions of self or of others.
  - Leave situation by quitting the job.
  - Change comparisons by choosing another object person.

- Feeling over-rewarded.
- Increase or decrease inputs.
- Distort ratios by rationalizing.
- Help the object person gain more outcomes.

# Expectancy Theory

- According to expectancy theory, the strength of a tendency to act in a certain way depends on the strength of an expectation that the act will be followed by a given outcome and on the attractiveness of that outcome to the individual.
- According to this theory individuals are motivated if they believe that:
  - There is a positive correlation between efforts and performance,
  - Favorable performance will result in a desirable reward,
  - The reward will satisfy an important need,
  - The desire to satisfy the need is strong enough to make the effort worthwhile.

# Techniques of Motivation

- It is very important in an organization to keep their employees motivated to keep doing their best towards achieving the organizational goals
- **Provide Meaningful and Challenging work**
  - When employees feel the work they are doing are meaningful and challenging in some way, they feel internally motivated
  - If a employee feels the work they are doing are actually having a big impact in the overall operation of the organization, they generally become more engaged and energized

- **Set clear targets, expectations and measure performance**

- It is of no point for employees to perform better if they are not clear of the targets they are to meet, or about the expectations from them by the management
- Management must be clear when they direct their employees about the objective of the organization and what expectation they have from their employees.  
Management should be able to bring the better performance out of everyone

- **Give regular, direct and supportive feedback**

- Giving regular feedback about the performance of each employees help them focus on their job better, make any improvements or changes when needed
- Feedback needs to be timely, specific and presented in such a way that the individual is clear about what behaviors or skills they need to modify (or continue using) in order to improve performance.

- **Value the employees**

- In a workforce there are also those kind of people who motivates themselves to perform better and they value their responsibility
- It is important for Management to value these individuals and make sure they are given credit for their work and respected

- **Training and development Programs**

- Regular training and development programs should be conducted on timely basis for employees to make themselves prepared for the future
- Employees feel motivated when they know they have better future in an organization and they are being invested for

- **Incentive Programs**

- Rewards, promotions, benefits, profit sharing, freedom can be provided by managers to motivate their employees

# Leadership

- Leadership is the process of influencing people and providing an environment for them to achieve team or organizational activities
- The activity of leading a group of people or an organization or an ability to do so
- An art of motivating a group of people to act towards achieving a common goal
- The leader is an inspiration and director of the action
- Process of influencing people and providing an environment for them to achieve the team or organizational goals
- Leaders arrange the work environment such as allocating resources, defining organizational goals
- For an organization to run smoothly, the top level management who are responsible to make decisions, create infrastructure should have sharp leadership skills
- Without better leadership skills, the company will struggle to sustain in long run

- Great leaders should possess the ability to adapt their behavior and styles according to the situation
- There is a difference between leaders and managers
- All leaders shouldn't necessarily be managers
- All managers to be successful must possess great leadership skills
- In simple words, a good manager is a leader, but a good leader is not necessarily a manager
- A manager holds a higher position, may lead a team, his functions vary from planning, directing to controlling, whereas a leader might be any one of the team members with strong influence over the others

# Qualities of a good Leader

- **Honesty and Integrity**

- A leader must be trustworthy, and be known to live their life with honesty and integrity
- A person of honesty and integrity is the same on outside and the inside
- A leader must have ethical behavior thus the trust of the follower

- **Personality/Confidence**

- A good leader is confident, in order to lead and set direction, a leader needs to appear confident in person and in leadership roles
- A leader who conveys confidence towards the proposed objective inspires the best effort from team members

- **Human Skills**

- Should know how to treat and talk to his members
- Give respect, give credit to people when due
- When people feel they that are being treated fairly, they reward a leader with loyalty and dedication

- **Initiative**

- A good leader must always take an initiative
- He/she must be able to construct and implement his own plans
- He/she must do the right thing at the right time without being told by others

- **Innovative**

- Must have a good imagination and visualization skills
- Must be able to combine new ideas with old ones and develop new tactics to solve problems

- **Communication skills**

- A good leader must be an effective and excellent communicator
- must be a good speaker and writer, must use simple language to give information, instructions and guidance to his followers

- **Discipline**

- A good leader must be a disciplined person
- must have respect for the rule and regulations of the organization, this is because his followers will follow his example

- **Committed to excellence**

- The good leader not only maintains high standards, but also is proactive in raising the bar in order to achieve excellence in all areas
- there is no greater motivation than seeing the boss down in the trenches working alongside everyone else, showing that hard work is being done on every level

# Leadership Style

- The behavioral pattern which a leader adopts is known as the style of leadership
- The leadership style in a particular situation is determined by the leader's personality, experience, values, nature of followers and the environment

# Autocratic Style/Authoritarian Style

- Gives orders which the leader insists shall be obeyed
- Autocratic leaders typically make choices based on their own ideas and judgments and rarely accept advice from followers
- Leaders make all the decisions, little or no inputs from the group members
- Autocratic leadership can be beneficial in some instances, such as when decisions need to be made quickly without consulting with a large group of people
- People who abuse an autocratic leadership style are often viewed as bossy, controlling, and dictatorial, which can lead to resentment among group members

# Democratic Style/Participative Style

- A democratic leader is one who gives orders after consulting the group
- Researchers have found that this leadership style is usually one of the most effective and lead to higher productivity, better contributions from group members, and increased group morale
- Policies are worked out in group discussions, and praise and blame will be shared by the group members
- Members of the group feel more engaged in the process, group members are encouraged to share ideas and opinions, even though the leader retains the final say over decisions

# Servant and Transformational leadership

- While both servant leadership and transformational leadership focus on empowering and developing individuals within an organization, the key difference lies in their primary motivation:
- Servant leaders prioritize serving others and fostering their well-being, while transformational leaders aim to inspire and motivate individuals towards a shared vision and goals; essentially, servant leadership puts the needs of the team first, while transformational leadership focuses on achieving a larger vision through individual motivation.

# Key points about servant leadership:

## **Focus on serving others:**

- The core principle is to lead by serving the needs of the team, putting their development and well-being above personal gain.

## **Empowerment and autonomy:**

- Servant leaders encourage individual decision-making and ownership of tasks, fostering a sense of autonomy within the team.

## **Relationship building:**

- Building strong, trusting relationships with team members is crucial for effective servant leadership.

## **Listening and understanding:**

- Actively listening to team members' concerns and perspectives is vital for a servant leader.

# Key points about transformational leadership:

## **Inspiring vision:**

- Transformational leaders articulate a compelling vision for the future, motivating individuals to work towards a common goal.

## **Intellectual stimulation:**

- They encourage creativity, critical thinking, and innovation within the team.

## **Individualized consideration:**

- Transformational leaders provide personalized support and mentorship to each team member based on their needs.

## **Charisma and role model behavior:**

- They often exhibit strong personal charisma and serve as positive role models for their team.

# Common between the two

## **Developing individuals:**

- Both servant and transformational leaders focus on fostering the growth and development of their team members.

## **Positive impact on the organization:**

- Both styles can lead to increased employee engagement, productivity, and overall organizational success.

# Learning Organization

- A learning organization is the term given to a company that facilitates the learning of its members and continuously transforms itself.
- Organizational learning is an area of knowledge within organizational theory that studies models and theories about the way an organization learns and adapts.
- Learning organizations develop as a result of the pressures facing modern organizations and enables them to remain competitive in the business environment.
- Organization need to learn faster to create a competitive advantage and to develop a customer responsive culture.
- Learning may be single loop and double loop

- I. Single-loop learning: In single-loop learning, individuals, groups, or organizations modify their actions according to the difference between expected and obtained outcomes
- II. Double-loop learning: Double loop learning is the learning about single-loop learning. In double-loop learning, the entities (individuals, groups or organization) question the values, assumptions and policies that led to the actions in the first place; if they are able to view and modify those, then second-order or double-loop learning has taken place

# Benefits of learning organization

- Maintaining levels of innovation and remaining competitive
- Being better placed to respond to external pressures
- Having the knowledge to better link resources to customer needs
- Improving quality of outputs at all levels
- Improving corporate image by becoming more people oriented
- Increasing the pace of change within the organization

# Characteristics of learning organization in ICT industry

- I. **Systems thinking:** This is a conceptual framework that allows people to study businesses as bounded objects
- II. **Personal mastery:** The commitment by an individual to the process of learning is known as personal mastery
- III. **Mental models:** The assumptions held by individuals and organizations are called mental models
- IV. **Shared vision:** The development of a shared vision is important in motivating the staff to learn, as it creates a common identity that provides focus and energy for learning
- V. **Team learning:** Team learning requires individuals to engage in dialogue and discussion; therefore team members must develop open communication, shared meaning, and shared understanding

# Challenges for motivating and leading technical workforce

1. Lack of clear and meaningful goals
2. Lack of feedback and recognition
3. Lack of autonomy and empowerment
4. Lack of growth and development
5. Lack of trust and respect
6. Lack of balance and well-being

# Strategies for motivating and leading technical workforce

1. Set attainable goals
2. Provide immediate praise for accomplishments
3. Create an employee incentive program
4. Ensure a healthy work-life balance
  - Encouraging breaks
  - Offering flexible scheduling
  - Providing work-from-home options

5. Create a positive work environment

- Encouraging autonomy
- Inspiring creativity and innovation
- Celebrating both professional and personal milestones

6. Encourage an open-door policy within the workplace

7. Provide opportunities for career development and advancement

## 8. Promote team collaboration

- Planning team-bonding activities
- Teaching conflict-management skills

## 9. Offer mentorship opportunities

## 10. Build trust within the team

## 11. Learn more about individuals

- 12. Offer help with individual goals
- 13. Inform team members about company happenings
- 14. Give frequent feedback
- 15. Assign manageable workloads

**Thank You**
